PROFILE

A business-oriented Engineer MBA with strong analytical skills. Experience in different industries and segments (Electronics, Telecommunication, and Business Consulting) specifically in aspects of operations, IT and Risk Management. Extensive experience in process improvement.

EDUCATION

Master of Business Administration, Strategy and ITM 2006
Sauder School of Business, University of British Columbia, Vancouver, BC, Canada

Bachelor of Science in Industrial Engineering and Management, Information Technology 2004
Ben-Gurion University, Beer-Sheva, Israel

PROFESSIONAL EXPERIENCE

Senior Risk Management Consultant 2007 - 2009
KPMG, Tel Aviv, Israel

KPMG is one of the world's leading professional services firms, offering audit, tax and advisory services. KPMG operates in 145 countries with more than 123,000 professionals working in member firms worldwide.

Reporting to RAS (Risks Advisory Services) manager, planned and executed IT & Business Process Risk Management assignments at leading firms from a variety of industries (e.g. banking, financial services and communication) as both a team leader and a team member, including: Sarbanes-Oxley (SOX) compliance, IT Audit and Risks & Internal Controls reviews of Business as well as IT Processes.

- Carried out various Governance, Risk and Compliance assignments at highly regulated clients such as Commercial and Investment Banks, publicly traded (U.S. SEC) firms and Financial Services firms, including reviewing the effectiveness of internal controls over financial reporting - process documentation, design assessment, gap remediation and testing.
- Managed several projects simultaneously while supervising junior staff and working closely with client management.
- Sample projects: Risk survey and risk based audit of business processes at UBS Israel; Business Processes reviews at First International Bank of Israel, Union Bank of Israel and Tamir Fishman (Israel's strategic partner with RBC Capital Markets); and special audit assignments at Menora Mivtachim, Pfizer Israel and ZIM Integrated Shipping Services.

Supply chain Consultant 2007
Programa Ltd. Raanana, Israel

Programa is a leading SCM and logistics consulting firm in Israel with a large top companies client base including Proctor & Gamble, Ikea, Nestle, Orange, Unilever, UPS, Zara and many others.

Reporting to business unit manager, in supply chain analysis and distribution centers planning projects performed hands-on field analysis, data and spreadsheet analysis, RFPs and presentations to clients.

- Participated in high scale logistics planning projects.
- Added immediate and ongoing real value to the firm as well as to the clients.
- Contributed to significant results directly affecting operations efficiency and financial status.

PROFESSIONAL EXPERIENCE CON'T

Operations Analyst 2006
Starworks Packaging and Assembly, Vancouver, BC, Canada

Starworks is a social enterprise that offers small, medium and large businesses the opportunity to outsource their high volume manual labour tasks. Among their customers are BC Hydro and Finning Canada.

As an MBA intern reporting to plant manager, performed strategic analysis, improved plant layout and flow of materials, quantified production activities, built expansion business plan and improved marketing.

- Upgraded plant layout in order to improve flow of materials in fixed, long-term contracts as well as in flexible short term or seasonal contracts, resulting in a 15%-25% improved processing time. Further implementation of my work would further improve times and clear more space.
- Marketing tasks - market research for finding prospective clients, improved website with videos and a more efficient quotation form, video enhanced presentation to address the issue of unclear capacity explanation to customers.
- Performed comprehensive and ongoing strategic analysis and business plan guidelines focusing and clarifying company's goals and future strategy - less mail fulfillments and more kits assembly.

Project Manager 2005
TAL Engineering Inc. Rishon Lezion, Israel

Tal Engineering is Israel's largest provider of electronic products for elevators offering products ranging from simple LED displays to sophisticated door indicators and digitally controlled braking systems.

Reporting directly to head director, developed and fully implemented a unique custom made production materials and WIP inventory management system combining different cross company programs, such as procurement, sales, accounting and the executive decision support system.

- Improved parts' search times by more than 50% through a fully computerized and integrated inventory system using improved Bills of Materials.
- Enhanced the efficiency of production, purchase and sales processes by implementing a new system in different functions within the company.
- Trained all future users on the system, and implemented a help desk for support.

COMMUNITY INVOLVEMENT
